

delineation

Posted by irma04 - 2008/06/26 03:30

Hi:

I want to know if is possible delinear an Urban Catchment using DEM 0.5x0.5 mts, of resolution, the catchment size is 120 km2. will be support this capacity AGWA?, because my application after was DEM of 30 mts. to Large watersehed.

Cheers

Irma Teresita

Hi Irma,

It should be possible, but I've never tried a watershed of that size with that resolution. I've used 1m LIDAR data before, but on significantly smaller delineations. What was wrong with the 30m DEM?
